Application/Control Number: 10/656,344

Art Unit: 3632

### **DETAILED ACTION**

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

## Claim Rejections - 35 USC § 102

Claims 1, 2, 6, 9, and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Jacobs (US patent no. 5,605,238). Jacobs disclosed all the claimed features of applicant's invention as illustrated below.

Claim Rejections - 35 USC § 103

Claims 1, 2, 4, 6-10, and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Vallett (128,569) in view of Jacobs (US patent no. 5,605,238). Vallett discloses all the claimed features of applicant's invention as illustrated in the previous Office action except for having an alignment lobe having a first arcuate surface being parallel to a second arcuate surface of an arcuate arm to define arcuate slot for slidingly receive a first arucate arm. Jacobs teaches a bracket assembly comprising an alignment lobe having a first arcuate surface being parallel to a second arcuate surface

Application/Control Number: 10/656,344

Art Unit: 3632

Art Offit. 3032

of an arcuate arm to define arcuate slot for slidingly receive a first arucate arm (see illustration above) to prevent translation of the slat or bracket in any direction relative to the forward slat or bracket (Col. 8, lines 1-2). It would have been obvious to one of ordinary skill in the art to have modify the bracket portions engagement of Vallet with an alignment lobe having a first arcuate surface being parallel to a second arcuate surface of an arcuate arm to define arcuate slot for slidingly receive a first arcuate arm to prevent translation of the bracket portions in any direction as taught to be desirable by Jacobs.

Claims 3 and 11-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Vallett (128,569) in view of Jacobs (US patent no. 5,605,238) as applied to claims 1 and 6 above, and further in view of Tobias (US patent no. 2,833,608). Vallett and Jacobs combined disclosed all the claimed features of applicant's invention except for providing height adjustable leg with first and second lock. To providing an height adjustable leg in a table to maintain a leveled table surface on irregular surfaces are conventional and well-known Tobias teaches a table top assembly having a height adjustable leg (15) via a set screw (20) having a first lock (21) to couple the leg parallel to the table top and a second lock (16) to couple the leg perpendicular to the table top. It would have been obvious to one of ordinary skill in the art to have modify the legs of Vallet and Jacobs combined such that they are height adjustable with locking means as taught by Tobias so as to maintain a desired height for the table.

Claims 20-22 are allowed.

Application/Control Number: 10/656,344

Art Unit: 3632

Claims 5 and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

## Response to Arguments

Applicant's arguments with respect to pending claims have been considered but are most in view of the new ground(s) of rejection.

#### Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Korie H. Chan whose telephone number is 571-272-6816. The examiner can normally be reached on Monday - Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Leslie Braun can be reached on 571-272-6815. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
